

**American
Shiba
2022
Expansion**

Official White Paper

American Shiba

This technical paper puts forth the upcoming developments planned for the expansion of the American Shiba Ecosystem. It details the benefits for USHIBA token holders as well as for veterans-oriented charities - the fundamental drivers of this cryptocurrency initiative. For a less technical presentation, please refer to the Summary Paper that offers a bird's eye view of the subject in a condensed format.

- 01** **Introduction to the Expansion**

Disclaimer

Investing in cryptocurrencies carries significant risks. The expectations, plans, statements and intents (referred to as "material") presented herein are not to be construed as a guarantee of future performance and undue reliance should not be placed on them. Such forward-looking material put forth in this document involve known and unknown risks and uncertainties, which may cause actual performance and financial results in the future to differ materially from any projections of future performance or result expressed or implied by such forward-looking statements.

Although forward-looking statements contained in this presentation are based upon what the volunteers comprising the American Shiba volunteer team believe are reasonable assumptions, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ substantially from those anticipated in such statements. Circumstances and factors outside of the volunteer's control may impede their abilities to implement this planned expansion and even prevent it from being deployed at all.

The material that follows is prepared and presented in good faith by the volunteer team and its representatives based on their best efforts, making use of all the information available at the time of publication. Results cannot be predicted nor guaranteed. Nothing contained in this document should be construed as financial advice or solicitation. Consult with a proper financial advisor to assess the suitability of cryptocurrencies such as this one in your investment portfolio.

As a general rule, do not invest more in cryptocurrencies than you are willing and capable of losing. If you are in any way unfamiliar with concepts such as blockchain, decentralized finance, custody (hard wallets in particular) and others that are essential to cryptocurrencies, you should first invest in yourself and spend the time necessary for you to understand the terminology, at the very least. Investing in cryptocurrencies may or may not be allowed in your jurisdiction. Please comply with all applicable laws to which you may be subject.

The updating of the whitepaper and expansion of the American Shiba USHIBA token has been completed in good faith and is in alignment to our mission to generate virtuous cycles of mutual benefit to:

- 1.) Improve the lives of veterans, their families, and their communities by supporting and educating veteran charity organizations that directly contribute to their financial, physical, and mental wellbeing.
- 2.) Improve the lives of all individuals that wish to participate in our ecosystem by holding all of their USHIBA tokens and answer the call to action by organically contributing to the growth of our non-profit missions.

Introduction

to the expansion

Current Tokenomics

2% Redistribution: Holders of the American Shiba USHIBA ERC20 token (“Flagship Token”) have benefited from a 2% redistribution generated from each transaction on the blockchain.

Deflationary: The remaining supply of the Flagship Token is under 5%, and is entirely available via Uniswap, but continues to be distributed to two burn wallets every time a transaction occurs. The burn wallet addresses (Vitalik Buterin’s Manual Burn and the Genesis Burn) own a large share of tokens (over 40% of the total supply of Flagship Token) and will continue to grow via compounding redistribution, as the Flagship Tokens that are in the burn addresses outweigh those of holders proportionally, thus the burn addresses receive a larger portion of the redistribution as it occurs, and the rest is distributed to the Flagship Token holders.

Expansion Plans

The USHIBA volunteers are introducing new benefits to holders of the Flagship Token by means of expanding the USHIBA Token itself onto additional blockchain networks. The first blockchain network we expand upon will be the Binance Smart Chain. The Official BEP20 USHIBA smart contract will be powered by an enhanced, automated, and efficient distribution system. This distribution system will ensure that holders of the Flagship Token are rewarded commensurately for participating patiently in the ecosystem and will further our charitable mission by allocating tokens to charities to act as liquidity providers.

This distribution will be automatic, requiring no action from the part of Flagship Token holders.

1) Holders of the ERC20 flagship token

2) Charity Partners to fund their organizations and act as liquidity providers

3) USHIBA Development Wallets to further the ecosystem

4) Exchanges for purchase (PancakeSwap, Sushiswap, Apeswap, FegEX, Dodo DEX, OpenOcean, etc.)

Fair Distribution & Safeguards

The entire distribution process is estimated to be completed by sometime in 2028. A fundamental characteristic of this sector in the American Shiba Ecosystem is the electrified nature of the deflationary features embedded in the contract. It is important to ensure our community holders that their hard-earned investments are cared for and protected.

The American Shiba 2022 Development Team has enabled functions in the Official BEP20 USHIBA smart contract that prevents any wallet address owner from adversely impacting token value based on a single transaction by setting a strict 1% transaction cap, meaning if you want to buy more than 1 QT Official BEP20 USHIBA, you will have to do so by conducting more than 1 transaction, as 1% of 100 is 1.

In addition, functions are enabled within the Official BEP20 USHIBA that prohibit any sell order from being more than:

- 1 Trillion Official BEP20 USHIBA: now until 12/30/22
- Further details to be released in 2023 whitepaper

This specific “MAX SELL LIMIT” function is scheduled to scale throughout the Contribution Events as they are conducted and completed and is programmed in a way to allow the change to be public upon the blockchain while following a schedule internally produced by the American Shiba Development Team.

This mechanic, when managed properly by a collaborative effort, is an “anti-whale/anti-dump” mechanic that can be used to offer a form of protection against malicious traders who may be intending to rob the liquidity pools or manipulate the price charts. If they buy all, in this example 1 QT, out of the pool, they’ll have to perform transactions of 1T thru time, or perform 1000 transactions with 1T all at once. This mechanism serves as deterrent for any malicious attempts to alter the value of our token. Even if such an attack occurs from malicious traders, it will be thwarted by our contract design, as liquidity pools will be expansive, not instantaneous, and will scale over time with the “MAX SELL LIMIT” function enabled upon the Official BEP20 USHIBA smart contract.

These functions, along with others in the future, must be disabled before USHIBA is eligible to be listed upon an upper echelon Centralized Exchange. However, it will remain intact until a lucrative exchange upgrade is executed. There will also come a time, in the future, where the ownership for the Official BEP20 USHIBA contract is renounced by the American Shiba Development Team. However, it first must be set-up, managed, and coordinated for further expansion appropriately by the collaborative team before any renouncement event will meet conditions to disable these functions.

Fund Accounting Practices

The structure of the American Shiba Project mirrors that which is commonly used in accounting for charities, universities, municipalities, hospitals and like organizations: segregated accounts set up to enable specific endeavors, otherwise known as fund accounting.

USHIBA Token holders will be able to monitor the movements in and usage of these wallets in real time, at any time, a key characteristic of blockchain technology. This clear and transparent structure is designed to enhance the intrinsic qualities of this initiative above and beyond its already strong and safe design and is “**certified rug-proof.**”

Another benefit of how the American Shiba Ecosystem is being built is that holders of any USHIBA Token wishing to make contributions to specific purposes will be able to do so, knowing that the donation will serve that exact cause. Those donations may originate sporadically or, if needed, following a call made by the Development Team.

Traditional terms in Fund Accounting, such as Restricted Accounts, Lock Boxes, Segregated Funds etc. can now replace those by blockchain terminology: Multisig Wallets and Smart Contracts. The herein proposed Ecosystem is a continuation of the growing trend in technology where “legacy” systems, processes, structures, methods and all are being replaced by blockchain technology. In this respect, the American Shiba Project is not ahead of its time... it’s exactly on time to serve the needs of charities enabling themselves and their financial wellbeing on the blockchain.

Wider Scope of Applications and Function

1) 100 QT BEP20 USHIBA expansion tokens minted on BSC blockchain for allocation

2) Rationale and Function based allocation of tokens

3) Rewards and Incentives distributed to holders of flagship ERC20 USHIBA and contributors to the project

4) Redistribution of tokens via surcharges and deductions

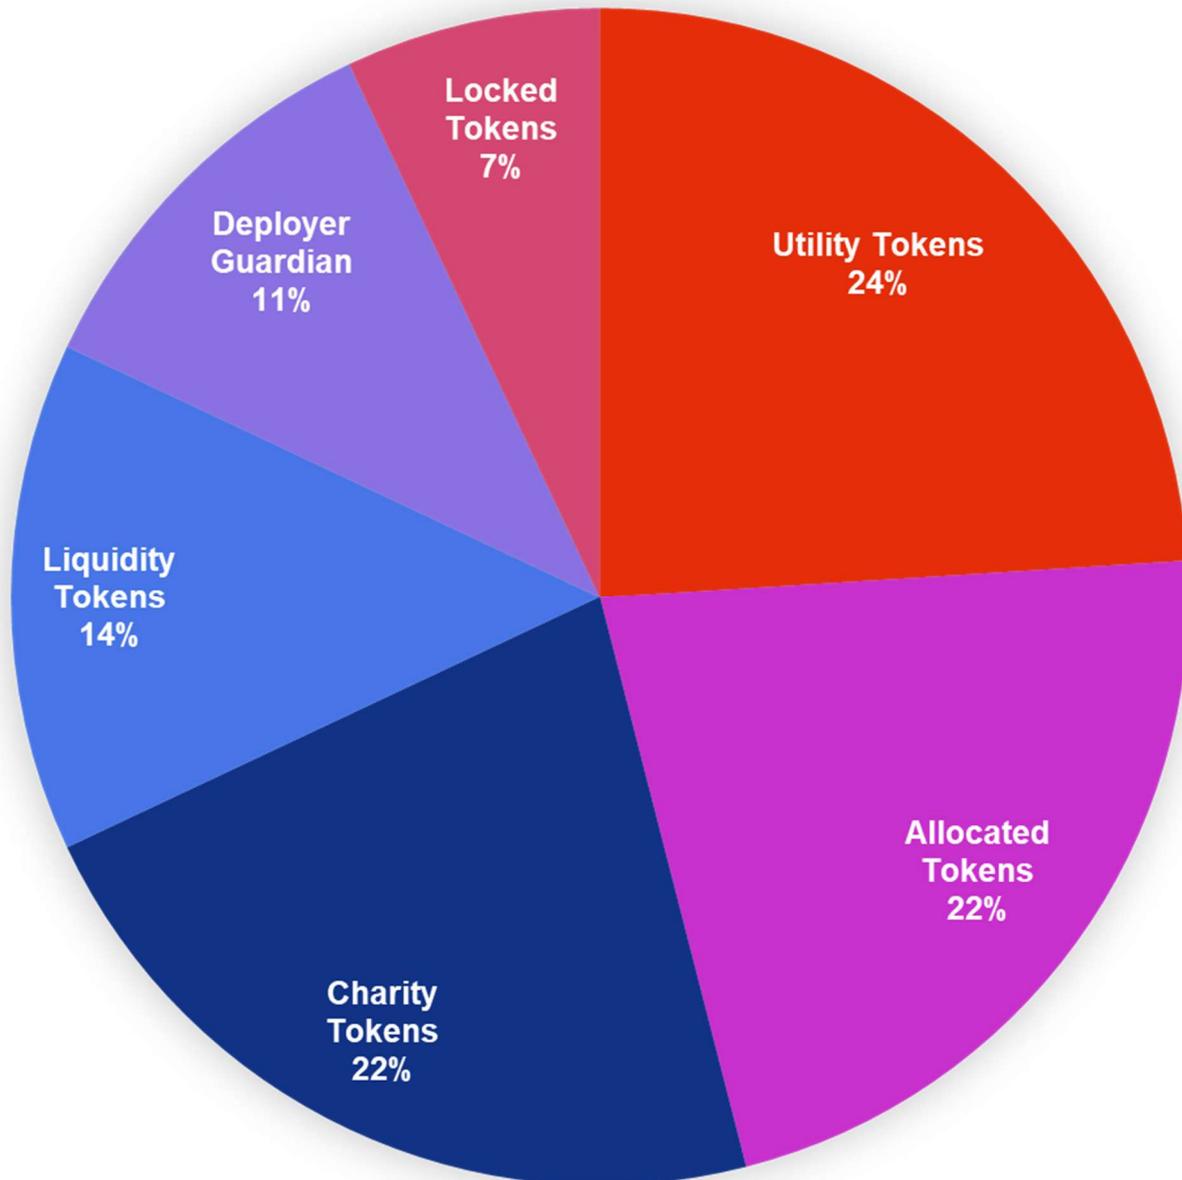

5) Smart contract programmed Guardians which fuel, direct, and protect allocations of tokens

6) Electrification, Redistribution occurs on every transaction on the block chain, including Guardians

Allocation of 100QT Minted Tokens

All 100 Quadrillion Tokens will be allocated via a specific rationale and function-based approach to support the USHIBA Ecosystem. All transactions, including exchange buys and sells, distribution of allocated tokens, and intra-project fund flow will benefit from redistribution. This includes, all guardians, allocated funds, charity multisig wallets, and liquidity pools since they will also be holders of the Official BEP20 USHIBA Token. Allocation of the tokens will issue via the following:

Charity Tokens: 22 Quadrillion (22%)

The team is working to establish many partnerships, beginning with 12 individual four-star veteran organization charities that cater to the needs of veterans that could stand to benefit from the expansion of the American Shiba Ecosystem. Each of the 12 charities will be granted access and keys to a multisig wallet that contains 1 Quadrillion Official BEP20 USHIBA Tokens, which will enable representatives of the charity we establish the partnership with to access, generate, and use the Official BEP20 USHIBA Tokens that the multisig wallet contains. In addition, 10 Quadrillion Official BEP20 USHIBA Tokens are also to be issued by the Charity Arm Guardian to make a total of 22 Quadrillion Official BEP20 USHIBA Tokens allocated for all charity purposes and partnerships from 2022 to 2028.

Deployer Guardian: 11 Quadrillion (11%)

Official BEP20 USHIBA Tokens issued to the Deployer Guardian are to be used for executing developmental transactions for the American Shiba Ecosystem. They have been specifically designated into separate funds on the blockchain for future use, research in the following areas:

- 2 Quadrillion to DeFi 1.0 Tech - '22-'23
- 1 Quadrillion to Bridge Solutions
- 1 Quadrillion to Atomic Solutions
- 1 Quadrillion to Wrapped Solutions
- 1 Quadrillion to Quantized Solutions
- 1 Quadrillion to Education Module Solutions
- 1 Quadrillion to DeFi 2.0 Solutions
- 1 Quadrillion to DeFi 1.0 Tech - '24-'25
- 1 Quadrillion to DeFi 1.0 Tech - '26-'28

Utility Guardians: 24 Quadrillion (24%)

Utility Guardian Tokens have been allocated to service specific operational functions and tasks within our ecosystem, including holder rewards. The first "snapshot" of the Ethereum Mainnet wallet addresses containing the Flagship USHIBA token was taken on January 10th, 2022 and on January 31st, 2022, to be used to begin issuing the first batch of rewards in BEP20 USHIBA to the Flagship USHIBA Token Holders, and is tentatively set to begin to distribute these rewards on March 31, 2022. Snapshots are data sets that will be used continuously throughout the American Shiba Project to satisfy holding parameters of Flagship USHIBA before executing reward transactions.

- 4 Quadrillion - C.I.G.A.R Guardian. (Community Incentives: General Action Rewards)
- 4 Quadrillion - Dispense Guardian.
- 4 Quadrillion - Distributor Guardian.
- 3 Quadrillion - Contributor Guardian.
- 3 Quadrillion - Special Ops Guardian.
- 3 Quadrillion - Multisig Guardian.
- 2 Quadrillion - Burn Guardian.
- 1 Quadrillion - NFT Guardian.

Allocated Funds 22 quadrillion, 22%

- 1 Quadrillion-NFT Fund
- 1 Quadrillion to Centralized Exchange Fund.
- 2 Quadrillion to Social Media Ads Fund.
- 2 Quadrillion to Press Marketing Ads Fund.
- 3 Quadrillion to the General Marketing Fund.
- 3 Quadrillion to Legal Fund.
- 5 Quadrillion to Binance Smart Chain Community Operations Wallet (bCOW).
- 5 Quadrillion to Binance Smart Chain Charity Action Transaction Wallet (bCAT).

Liquidity Pools: 14 Quadrillion (14%)

Liquidity pools will be established on decentralized exchanges for buying and selling of the Official BEP20 USHIBA Token.

Those interested in acquiring the Official BEP20 USHIBA but are not interested in participating in initial Contribution Events, where they can acquire the Official BEP20 USHIBA at a locked-in rate, will be able to do so by swapping one digital asset into the Official BEP20 USHIBA after completion of the Alpha Contribution Event.

IOUs are written to Chief Escrow Guardian for a total of 5.2 Quadrillion, to use with Officer Escrow Guardian to conduct the Event.

IOUs are written to Distributor Guardian for a total of 8.8 QT to be used for the Subsequent Contribution Events.

The total equals a minimum of 14 Quadrillion Official BEP20 USHIBA Tokens to be allocated for liquidity purposes.

Locked Tokens: 7 Quadrillion (7%)

A portion of tokens will be locked in future designation and use: 3% until 2026, and 4% until 2028. More details about how these tokens are used once unlocked will be published in the 2023 whitepaper.

Contribution Events

It is common practice for charitable and not-for-profit organizations such as hospitals, research centers, foundations and the like to embark on larger scale projects and initiatives to expand the scope of their enterprise. Whether it is to enlarge their premises or offer new services, these organizations will announce their upcoming developments, thereby attracting contributions from benefactors who support the advertised initiative, willing to share their wealth with their community “for the greater good”. In return, it is common practice for the receiving organizations to reward their supporters by arranging for public recognition, branding buildings or foundations to their family or corporate names. Benefactors receive significant, lasting social value and prestige from these donations. It is not common for large scale donations to remain fully anonymous because of the valuable recognition and validation they enable.

To expand the American Shiba Ecosystem, The American Shiba Development Team will require similar support from its believers. For this proposed expansion to take place, resources will be needed to pay for development, legal counsel, network fees, and other types of expenses associated with growing the ecosystem and achieving our mission. As our holders may appreciate, the American Shiba Project does not currently own buildings and its supporters are only identifiable by anonymous wallet addresses. Therefore, to incentivize donations to enable the expansion, the team is granting financial Contributors tokens as recognition for their trust in this proposed plan of action and these new tokens will be sent directly to the Contributors’ wallet addresses.

Participants in Contribution Events have full authority to act upon the Contributor Tokens they receive throughout their Contributor Events Schedule. **It is important to note that the below events have a vesting time schedule built into them, so contributors do not have the ability to interact with all their tokens immediately to artificially and maliciously affect the price of the token. This vesting schedule was designed to set up a fair system free from one single individual or team of individuals negatively affecting the token value.**

Alpha Event

Participants in Alpha Event, where 1 BNB = 100T Official BEP20 USHIBA, will receive their tokens via the Alpha Schedule.

Bravo Event

Participants in Bravo Event, where 1 BNB = 90T Official BEP20 USHIBA, will receive their tokens via the Bravo Schedule.

Charlie Event

Participants in Charlie Event, where 1 BNB = 80T Official BEP20 USHIBA, will receive their tokens via the Charlie Schedule.

Alpha Event allows a total of 10 Participants: 10 BNB = Completed Event.

Bravo Event allows a total of 20 Participants. 20 BNB = Completed Event.

Charlie Event allows a total of 30 Participants. 30 BNB = Completed Event.

Subsequent Events

Participants in Subsequent Events, where 1 BNB = variable amounts of Official BEP20 USHIBA, receive their tokens via Subsequent Schedule.

Subsequent Events allow a minimum of 890 Participants after all 6 Subsequent Events are complete.

Once Subsequent Events have ended, there will never be any more Contributor Events upon the Official BEP20 USHIBA.

By the time the Last Subsequent Event is completed, a minimum of 14 Quadrillion Official BEP20 USHIBA Tokens will be considered "Circulating Supply", or "Fair Tokens", determinant on how many Allocated Fund Tokens have already been converted for Project Functionalities throughout the chronological order of the Events.

Incentivizing Contributors & Holders

American Shiba at its core is a decentralized community geared toward empowering veteran charity organizations to serve our veterans. Within the veins lies a community-driven and volunteer led effort which means the more members and contributors within our community, the better.

All holders of the ERC20 Flagship Token are eligible and will receive rewards for holding their ERC20 Flagship Tokens. These rewards will happen automatically by airdrop of the Official BEP20 USHIBA Tokens to the holder's wallet via the C.I.G.A.R Guardian, if holding requirements are met and kept. In addition to this effort, we keep an open door in the project as a way of making community members with extraordinary ideas, talents, patriotism, time to donate, or genuine social media reach the opportunity to participate and be further rewarded.

To incentivize Community Participation, we rank Contributors in the American Shiba Project thereby making them eligible for receipt of Official BEP20 USHIBA Tokens from the Contributor Guardian, and potentially have those rewards stack with the receipt of the Official BEP20 USHIBA tokens from the C.I.G.A.R Guardian, if they remain a holder of their ERC20 Flagship Tokens. Recently, Community Members have been graciously funneling in to contribute articles, graphics, videos, ideas and even crypto donations to the Community Operations Wallet (COW) to support the growth of the project.

We want to reward these Contributions from Community Members that we've received thus far from part of our 9,100 holders of the ERC20 Flagship Token. We do this by applying a stacked reward rate (meaning adding rewards upon rewards) to their wallet address to be issued an increased amount of the Official BEP20 USHIBA Token from the C.I.G.A.R Guardian.

This mechanic presents a wide horizon of opportunity for Community Members to elevate themselves into Contributors who answered the Call to Action. The Development Team has smart contract tools to reward and prioritize these Contributors, pertaining to the degree in which they contribute. We do so to equip them with morale to continue contributing to the Project and to perhaps guide & recruit new Community Members to join and become future Contributors themselves. Contributor Ranks are currently divided into three (3) "Tiers"

Contributor Tier Ranks

Tier I: +1% reward rate, composed of:

Donators, Researchers I, Community Mods, Marketers I.

Contributor Tier Ranks (Continued)

Tier II: +2% reward rate, composed of:

Sponsors, Researchers II, Community Admins, Marketers II.

Tier III: +3% reward rate, composed of:

VIPs, Core Team, Researchers III, Community Veterans, Marketers III.

Tier IV: +4% reward rate, composed of: (Not in utilization until 2023 whitepaper)

Electrification of the Guardians

Guardians are smart contract programmed, multi-signature wallets containing Official BEP20 USHIBA Tokens which protect, direct, and distribute Official BEP20 USHIBA Tokens over time for specific Functions and Applications. In order to support a continuous and virtuous cycle (or “electrification”) of the American Shiba Ecosystem, we have also developed the following deductions and surcharges.

Deductions

Deductions are a custom, internalized way to artificially reduce the velocity in the number of tokens being traded upon by the Guardians.

Depending on which Guardian you are issued tokens from, determines which specific deductions, if any, apply before the issuance of tokens to you.

When Guardians are sending tokens, deductions apply to the amount in which Guardian is issuing:

(Total tokens being issued [gross] - deductions = Total tokens being issued [net])

Surcharges

Surcharges are a custom, internalized way to artificially throttle the velocity in the number of tokens being used from allocated funds (e.g.: Legal, Social Media Ads, Press Ads, etc.).

Which allocated fund being interacted with determines which certain surcharges apply.

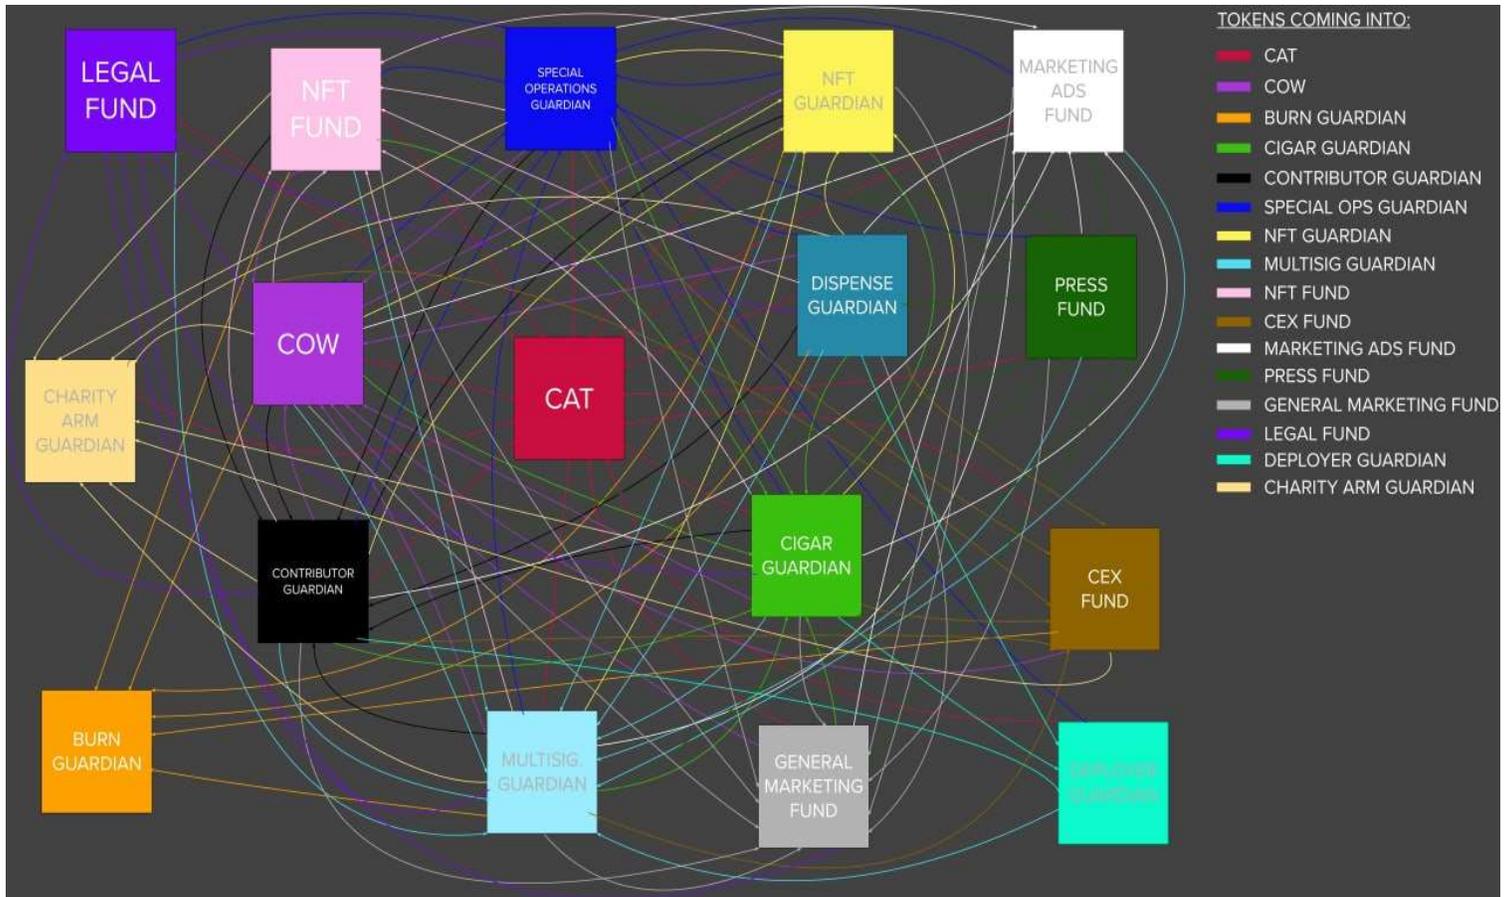

The surcharge is measured by 1% of the total transaction in BEP20 USHIBA tokens, and then applied accordingly.

(100% of total tokens being interacted with in transaction + surcharges = new 100% amt of tokens being interacted upon.)

Utility in Motion

As surcharges and deductions flow throughout our Ecosystem we ensure the velocity of Tokens is controlled and distributed throughout the specific funds and Guardians. This is essential to power our ability to achieve our growth and accomplish our mission. In order to better comprehend the electrification of our Ecosystem, the following flow chart was created to visualize the in-flows and out-flows of deductions and surcharges, to and from each fund or guardian.

As the flow chart exhibits, there are multiple in-flows and out-flows for each specific Guardian and fund. These in-flows and out-flows have been strategically designed to ensure that each specific function and goal of the Project can be met and continues to be funded throughout. With the electrification of our ecosystem, it will be impossible for specific funds & Guardians to become obsolete.

Guardians

Roles, Function, & Distribution

Deployer Guardian

This Guardian has Official BEP20 USHIBA Tokens that will be used to reinvest into the American Shiba Ecosystem to ensure that long-term sustainability of the initiative and continued relevance of the contract remains a priority.

Receives supplemental funding from: C.I.G.A.R Guardian, Contributor Guardian, and Dispense Guardian.

Subject to surcharges to: CAT, Special Ops Guardian, and MultiSig Guardian.

Supporting the following functions:

Defi 1.0 solutions (22-23) - Stake Official BEP20 USHIBA to earn more Official BEP20 USHIBA, BNB;

Special Ops - to address any future need not foreseen today.

Bridge - to develop connections to other blockchain networks.

Wrapped solutions - to enable trading and pairing on various exchanges.

Expansive liquidity - establish multiple asset pairs (USHIBA/LINK, USDC etc.)

Atomic - critical blockchain mechanism to execute cross-chain trades.

Educational - to deploy material across several medias to help educate veterans about cryptocurrencies.

Quantized - to enhance smart contracts against attacks generated from quantum computers.

Defi 2.0 - “Smart DeFi” Announcements will be made as we progress toward this arena.

Defi 1.0 (24-25) Stake BEP20 USHIBA to earn BNB, + (see 2023 whitepaper);

Defi 1.0 (25-26) Stake BEP20 USHIBA to earn USDT, + (see 2023 whitepaper).

Charity Arm Guardian

A total of twelve (12) charities will be assigned and given complete access to multi-signature wallets. Each charity will gain access to a total of 1.8 quadrillion tokens once the Charity Arm Guardian distributes tokens to each wallet to “top-up” the original 1 QT in each Charity Partnership Multisig Wallet from Token Allocation. These charities have been identified and the American Shiba Development Team has initiated contact with a number of them. Announcements will be made as we progress towards concluding agreements with each of them.

Receives supplemental funding from: COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, MultiSig Guardian, Dispense Guardian, and the NFT Fund and CEX Fund.

Subject to zero surcharges or deductions.

Utility Guardians

Designed to support the ecosystem’s various operations:

NFT Guardian- adds tokens to the NFT fund, to fuel continuous development and creation of current & future NFT collections/designs.

Burn Guardian- one-way multisig wallet in which tokens can only be deposited, never to be retrieved.

Special Ops Guardian- Adds tokens to the Press, Social Media, General Marketing, Legal, and CEX Fund.

Contributor Guardian- distributes Tokens on demand or in a scheduled manner by the team to helpers as reward for their work in furthering the Project’s endeavors.

MultiSig Guardian- wallet requiring several team members to approve moving tokens to COW & CAT on demand.

C.I.G.A.R Guardian- administrates “Community Incentives and General Action Rewards”.

Distributor Guardian- will succeed the Officer Escrow Officer, which expires after Alpha, Bravo, and Charlie Contributor Event. Distributes tokens from rewards campaigns, extended liquidity generation events, liquidity mining campaigns. Token issuances are based on Subsequent Schedule(s).

Dispense Guardian- Tokens to be strategically dispensed as organic outreach and growth to project through time.

CAT: Charitable Action Transaction Wallet

Designed for transacting and keeping track of all transactions pertaining to charity donations we perform.

Receives supplemental funding from: 1% of Subsequent Event Tokens.

Receives supplemental funding from: 1% from: transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Operations Guardian, NFT Guardian, Multisig Guardian, Dispense Guardian, NFT Fund, CEX Fund, Social Media Ads Fund, Press Ads Fund, General Marketing Fund, Legal Fund, Deployer Guardian, Charity Arm Guardian

Subject to zero surcharges and zero deductions

COW: Community Operations Wallet

Designed for keeping all initiative transactions we perform on behalf of the community in one place on the blockchain.

Receives supplemental funding from: 1% of Subsequent Event Tokens.

Receives supplemental funding from: 1% from transactions performed by:

C.I.G.A.R Guardian, Contributor Guardian, Special Operations Guardian, NFT Guardian, MultiSig Guardian, Dispense Guardian, NFT Fund, General Marketing Fund

Subject to 1% surcharges to:

Burn Guardian, C.I.G.A.R Guardian, Contributor Guardian, Special Operations Guardian, NFT Guardian, Multisig Guardian, Dispense Guardian, NFT Fund, CEX Fund, Social Media Ads Fund, Press Ads Fund, General Marketing Fund, Legal Fund, Charity Arm Guardian

C.I.G.A.R Guardian

The Community Incentives and General Action Rewards Guardian is designed to reward ERC20 Flagship Token holders in Official BEP20 USHIBA Tokens through community incentive rewards, community rewards, community incentives, and airdrop rewards.

-USHIBA Holders benefit from an increased Action Rewards Rate if holding the ERC20 & BEP20 USHIBA.

-USHIBA Holders benefit from an increased Action Rewards Rate if providing more than \$5K liquidity via decentralized exchanges (e.g. PancakeSwap, etc.)

-Staking: Holders will be able to benefit from staking their Official BEP20 USHIBA Tokens.

1.) more bep20 Ushiba

* 10x accelerated rewards thru 2022

* Standard reward contract deployed on 3/31/24 for years = 4

2.) extra BNB

* 5x accelerated rewards starting thru early 2024

* Standard reward contract deployed on 3/31/25 for years = 3

3.) supplemental BUSD

* 2x accelerated rewards starting thru early 2025,

* Standard reward contract deployed on 3/31/26 for years = 2

Receives supplemental funding from: 1% of Subsequent Tokens

Receives supplemental funding from: 1% from: transactions performed by:

COW, Contributor Guardian, Special Operations Guardian, NFT Guardian, MultiSig Guardian

Dispense Guardian, NFT Fund, General Marketing Fund

Subject to deductions on each transaction to:

CAT, COW, Contributor Guardian, Special Operations Guardian, NFT Guardian, MultiSig Guardian,

NFT Fund, CEX Fund, Social Media Ads Fund, Press Ads Fund, General Marketing Fund, Legal Fund,

Deployer Guardian, Charity Arm Guardian

Contributor Guardian

Designed for rewarding Holders of the ERC20 Flagship Token and Contributors to the American Shiba Project by slowly issuing tokens to:

- ERC20 USHIBA Holders who participate in our BEP20 Contribution Events.
- ERC20 USHIBA Holders who participate in our BEP20 USHIBA Community Incentive Events.
- ERC20 USHIBA Holders who elect to obtain any generation of our NFTs that are put to market.
- ERC20 USHIBA Holders who elect to become BEP20 USHIBA Liquidity Providers in PancakeSwap (2k pool minimum)
- ERC20 USHIBA Holders who elect to become BEP20 USHIBA Liquidity Providers in BSC SushiSwap (2k pool minimum)
- ERC20 USHIBA Holders who have, at any time through 2021, donated any ETH to the eCOW
- ERC20 USHIBA Holders who have, at any time through 2021, donated any BNB/BEP20 to the bCOW
- ERC20 USHIBA Holders who have, at any time through 2021, donated any other network's token to any other multisig (team operated) wallet.
- ERC20 USHIBA Holders who have an Applied Rank to their profile on our Telegram and/or Discord channels (see tiered ranks)
- ERC20 USHIBA Holders who have an Applied Rank and have provided recognized, constructive, and implemented input to the Project's REV throughout its development. (See tiered ranks)
- ERC20 USHIBA Holders who have, at any time through 2021, elected to send more than 1 billion ERC20 USHIBA to Vitalik Buterin's manual burn (0x042...069)
- ERC20 USHIBA holders who have, at any time through 2021, elected to send more than 1 billion ERC20 USHIBA to the 0x000dead burn address.
- ERC20 USHIBA holders who have, at any time through 2021, elected to participate in sending Vitalik Buterin messages in ETH transactions to request him to burn his erc20 ushiba tokens (from 10/22/21 to 11/1/21)
- ERC20 USHIBA holders who elect to become ERC20 USHIBA Liquidity Providers in Uniswap V3 (\$100k minimum pool, with at least 80% fees generated donated to eCOW, in order to be eligible)
- ERC20 USHIBA holders who elect to become ERC20 USHIBA Liquidity Providers in ETH SushiSwap (\$100k minimum pool, with at least 80% fees generated donated to eCOW, in order to be eligible)
- And more as they develop!

Special Ops Guardian

Designed for funding strategic operations to conduct monumental accomplishments throughout the lifespan of the American Shiba Project. Examples include, paying for legal counsel, legal fees for being a nonprofit, centralized exchange fees, marketing initiatives, supplemental NFT funding, and other necessary and strategic operations

Receives supplemental funding from: 1% of Subsequent Tokens

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, NFT Guardian, MultiSig Guardian, Dispense Guardian

Subject to deductions on each transaction to:

Charity Arm Guardian, CAT, COW, NFT Fund, CEX Fund, Social Media Ads Fund, Press Ads Fund, Marketing Fund, Legal Fund

Burn Guardian

Designed to manage funds to be designated for burning to ensure a hyper-deflationary currency.

Receives +1% from: COW, Dispense Guardian, NFT Fund, MultiSig Guardian.

Receives: 50% of Official BEP20 USHIBA: used to conduct NFT Sales, Store Sales.

Burn Schedule:

EOY 2022: there will be at least 1.0 Quadrillion Official BEP20 USHIBA tokens in the burn address.

EOY 2023: there will be at least 1.5 Quadrillion Official BEP20 USHIBA tokens in the burn address.

NFT Guardian

Routinely adds tokens to the NFT fund, to fuel continuous development and creation of current & future NFT designs and collections.

Receives supplemental funding from: 1% from transactions performed by:

COW, Contributor Guardian, Special Ops Guardian, Dispense Guardian

Subject to deductions on each transaction to:

CAT, COW, Burn Guardian, Special Ops Guardian, MultiSig Guardian, NFT Fund, General Marketing Fund

Multisig Guardian

Routinely adds tokens to the COW and CAT

Receives supplemental funding from: 1% from: transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, NFT Guardian, Dispense Guardian

Subject to deductions on each transaction to:

CAT, COW, Burn Guardian, C.I.G.A.R Guardian, Contributor Guardian, NFT Guardian, Dispense Guardian

Dispense Guardian

Designed to interact with tokens that are to be strategically dispensed as organic outreach and growth to the project.

Subject to deductions on each transaction to:

CAT, COW, Burn Guardian, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, NFT Guardian, MultiSig Guardian, NFT Fund, CEX Fund, Social Media Ads Fund, Press Ads Fund, General Marketing Fund, Legal Fund, Deployer Guardian, Charity Arm Guardian

NFT Fund

Funding account to design, deploy, and market NFT collections

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian

NFT Guardian, MultiSig Guardian, Dispense Guardian

Subject to surcharges on each transaction to:

CAT, COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, Multisig Guardian

General Marketing, Charity Arm Guardian

CEX Fund

Fund to get onto one or many upper echelon centralized exchanges.

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, MultiSig Guardian,

Dispense Guardian

Subject to surcharges on each transaction to:

CAT, COW, Charity Arm Guardian, Burn Guardian

Social Media Ads Fund

Funding account to continuously deploy social media ad campaigns for extended cycles of time to recruit new holders and contributors to our ecosystem

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, MultiSig Guardian,

Dispense Guardian, Press Ads Fund, General Marketing Fund

Subject to surcharges on each transaction to:

CAT, Special Ops Guardian, MultiSig Guardian, Press Ads Fund, General Marketing Fund

Press Ads Fund

Fund for continuously enabling media and press articles to be written to educate investors and grow our holders and contributors.

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, MultiSig Guardian, Dispense Guardian, General Marketing Fund, Social Media Ads Fund

Subject to surcharges on each transaction to:

CAT, Special Ops Guardian, MultiSig Guardian, Social Media Ads Fund, General Marketing Fund

General Marketing Fund

Fund containing additional resources to be used for strategic marketing campaigns and initiatives. Can be used to supplement social media and press ad funds, or campaigns outside of these methods.

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, NFT Guardian
MultiSig Guardian, Dispense Guardian, NFT Fund, Social Media Ads Fund, Press Media Ads Fund

Subject to surcharges on each transaction to:

CAT, COW, Special Ops Guardian, MultiSig Guardian, Social Media Ads Fund, Press Ads Fund
Legal Fund

Legal Fund

Fund to finance legal fees, trademark fees, patent fees, registered agents, yearly necessities and renewal fees.

Receives supplemental funding from: 1% from transactions performed by:

COW, C.I.G.A.R Guardian, Contributor Guardian, Special Ops Guardian, MultiSig Guardian, Dispense Guardian, General Marketing Fund

Subject to surcharges on each transaction to:

CAT, Special Ops Guardian, MultiSig Guardian

Forward Thinking

Increasing Awareness

There are thousands of cryptocurrencies available to anyone. A large number have little use, no function and many have been abandoned. American Shiba is patriotic and proud to serve those who have served, and it will not be kept a secret for long.

The team is embarking on a series of measured campaigns to increase awareness. Direct contributions and redistributions in the COW as well as pledges from supportive holders will enable marketing efforts to “let the dog out” of the yard and into the world. These investments are essential to the future success of American Shiba.

Already, a petition was launched in the fall of 2021 to have the Flagship USHIBA Token listed on Robinhood. The American Shiba Development Team invites any individual or collective that has an interest in seeing the American Shiba Project succeed to join our efforts to spread the word and contribute to the team in one way or another. Successful Contributors will be rewarded by the American Shiba Development Team via Guardians and potentially on a case-by-case basis.

Increased Usage Cases

The American Shiba Team has identified several potential enterprises that stand to benefit from accepting our tokens as a payment instrument in the following fields: consumer goods, gaming, metaverse

We will be approaching these prospective entities over the course of 2022. However, no success can be guaranteed in these initiatives.

Timelines

It is common practice for cryptocurrency white papers to set schedules or milestones by which readers and holders can measure progress and work accomplished by the team. In fact, it is sound business practice to set evaluation timelines by which any stakeholder can gauge the progress of an endeavor - or lack of. In North America, publicly listed companies are required to publish quarterly results to enable their shareholders to assess management’s performance. Unfortunately, the frequent reporting imposed by financial markets has the unintended consequence of encouraging management to focus on short term decisions made to increase stock price at the detriment of long-term success. Examples of such phenomena are legion, whether in the banking, telecom or consumer goods sectors to name a few, and the burgeoning world of blockchain-based enterprises is no exception.

Often, developers and their colleagues struggle to meet these self-imposed quarterly deadlines which inevitably results in mass disappointment, thus encouraging speculation (of whether the progress will take place or not). Because the Project is led by a small number of volunteers, the team took the decision to not set short-term milestones and deadlines for any of the work planned in this document over the coming year.

American Shiba is an initiative driven to achieve long-term, sustainable and permanent success to benefit its stakeholders. For that intention to materialize, the team must be free of impediments. We will not hurry our work to please a few in a short-term unsustainable way, but we will implement the correct action plan to benefit many for the foreseeable future.

Team Composition

The cryptocurrency market has been described by many as a “wild west”, absent of any governing body, relying on an individual's moral compass (functioning or not) to lead or take part in a team that may or not have third parties’ best interest at heart.

There are no standardized code(s) of ethics, and the pseudo anonymous nature of cryptocurrencies make it an ideal playground for nefarious actors to engage in what’s known as “rug pulls” and “pump and dump” schemes.

In such cases, a bad actor can generate rapid personal wealth with minimal amounts of work at the expense of others who were attracted by a manufactured hype promising long term success or some other false pretext. There is virtually no end to the number of such cases, even involving centralized exchanges where principals have literally disappeared with their client’s money.

At the heart of USHIBA is the ethos to conduct a fair and worthy organization that can positively affect the lives of veterans and all holders of our tokens. We strategic have set up a system to avoid any of the pitfalls that we have described above.

The American Shiba team is comprised of an experienced developer, a professional accountant, a practicing lawyer, a sales and marketing professional, a scientist, and other highly educated individuals. In addition to the core team, we also have other enthusiasts committed to the cause that USHIBA serves.

A process is in place to ensure the individuals making up the team are who they claim to be, their qualifications are indeed as advertised and none of them carry criminal records.

Certifications/Audits

Third party experts provide valuable comfort to the general public by providing assurances that the structure and environment of a cryptocurrency contract are as they are advertised and contain no detrimental risk factors. In June 2021, American Shiba ERC20 received a “pass” score from Techrate on its contract characteristics, recommending a minor fix on “out of gas” exceptions. From that point on, stakeholders had confidence in the USHIBA token’s legitimacy to move the project forward.

Once the expanded contract is deployed, the team will work at obtaining the seal of approval from Certik, the leading certification provider in the crypto sphere. As to be expected, the cost of their services is commensurate with their quality. As such, the team is exploring options to absorb the cost involved.

Legal Considerations

The team is pleased to inform stakeholders that legal protections will be sought to trademark and protect our brand. We also have lofty goals of formally incorporating as a non-profit entity. Details on progress and status will be released on the telegram and discord groups when available.

Languages

To expand the reach of this initiative, the team will be arranging for documents and material to be translated in other languages. This will allow others around the world who do not speak English to participate in our ecosystem free of barrier.

Business Continuity

At present time, the team is composed of a small number of motivated individuals who are each dedicated to adding value to the initiative. Operating in a small team environment has several advantages such as rapid decision making, ease of communication, and collegial atmosphere, but also carries a few unique inconveniences and risks such as volunteer fatigue and burnout, concentration of talent, and exposure to other life issues.

To that end, the team is actively seeking talented individuals who are supportive of their veterans and who can commit their talents and skills to make a difference. In addition, access to various software and applications necessary to operate this initiative in a way that, should the team suffer a decline in manpower, the remaining members of the group can continue deploying the developments herein presented.

Closing

Review of Objectives

We hope you join us on this journey to support our patriotic heroes. Join our telegram & discord today to receive live updates as they come. Do not trade into false or misleading smart contract address claiming to be BEP20 USHIBA's. Our website, CoinGecko, and CMC page will list the official contract address at some time in April 2022. The Official BEP20 USHIBA smart contract is scheduled to execute on 3/31/22.

Positive Impact to Charities

The goal of the American Shiba Project is to positively impact charities that support veterans. We seek to achieve this through allocation of funding specifically set aside for each participating charity, as they come. In addition to providing funding via secure multisig wallets, we seek to empower the organizations through cryptocurrency education and the ability for these charities to act as long-term liquidity providers. By acting as long-term liquidity providers, each charity will benefit from the virtuous cycles of our ecosystem, which will compound the donations that were provided in each wallet.

Rewards to Holders

At the core of USHIBA are our dedicated holders from across the globe that have banded together for a common mission to support veterans and to create a decentralized community token that aims to do good in the world. Without our holders, our community, and our contributors, none of this would be possible. It is for that reason that we seek to reward both the holders of our ERC20 Flagship USHIBA Token, and the Contributors to the American Shiba Project, as our holders and contributors have invested not only their time in the project, but also their hard-earned money.

Appendix

Contribution Event Schedules

The Contribution Events are designed to provide liquidity across many decentralized exchanges.

The Alpha, Bravo, and Charlie Contribution Event Schedule is a function within the Chief & Officer Escrow Guardian smart contract, provided that the Chief Escrow Guardian was first interacted with to obtain a locked-in rate of Official BEP20 USHIBA for 1 BNB, of which those tokens are to be provided to the participant of the Contribution Event by the Officer Escrow Guardian.

ALPHA EVENT

3/31/22: Deployer Guardian "loans" 1 QT Official BEP20 USHIBA Tokens to the Chief Escrow Guardian to conduct the Alpha Contribution Event.

Advise the Community on 2/22/22 to have their BNB ready by 4/3/22.

Chief Escrow Guardian is open for Alpha Contribution Event on 4/4/22 (at midnight)

- 1.) Deployer Guardian -> 1QT Official BEP20 USHIBA -> Chief Escrow Guardian.
- 2.) Alpha Participant -> 1 BNB -> Chief Escrow Guardian.
- 3.) Chief Escrow Guardian -> 1% (1T) -> Alpha Participant.
- 4.) Chief Escrow Guardian -> 99% (99T) -> Officer Escrow Guardian.
- 5.) Officer Escrow Guardian interacts with 4% (3.96T) as tax and repurposes for operations.

990B -> Legal Fund

990B -> Contributor Guardian

990B -> CIGAR Guardian

990B -> Special Ops Guardian

leaving Alpha Participant with a new "100%" total, equal to 95% or 95T.

- 6.) Officer Escrow Guardian -> Alpha Participant

*Guardian begins issuing starter ~75% (~75T) over 12 months, starting 30 days after Alpha Contribution Event completion.

- 7.) Officer Escrow Guardian -> Alpha Participant

*Guardian begins issuing remaining ~25% (~25T) over 6 months, starting (~5/x/23) and will have (~95T) by no later than 10/31/23.

1QT Official BEP20 USHIBA Tokens are distributed as rewards to Alpha Participants and will be fully collected by no later than 10/31/2023 via Contributor and Officer Escrow Guardian.

Alpha Event is when 1 QT Official BEP20 USHIBA Tokens and 10 BNB is added into Pancakeswap.

Liquidity Provider (LP) Interaction will occur immediately once notice of a Contribution Event is completed is received.

Alpha LP Interaction:

~\$1000 (~25%) after 30 days lock (unlocks 5/~22)

another ~\$1000 (~25%) 30 days after that (unlocks 6/~22)

with another ~\$1000 (~25%)30 days after that (unlocks 7/~22)

with a final ~\$1000 (~25% 90 days after that (unlocks 10/~22)

A.) ~25% LP tokens locked in mudra for 1 month. (Unlocks 30 days after event completion (5/~22)

Delegation functions as:

0.) redeem x bnb for (\$200) in stablecoin and send to CAT.

1.) transfer x bnb for (~\$200) in bnb and send to Deployer Guardian.

2.) redeem x bnb for (~\$250/.5 WBNB) to be put into FibSwap Private Pool.

3.) redeem x bnb for (~\$250 into stablecoin), put into proactive Liquidity Reserve:

0x58b96a9af732b0EB60624C7f993dF476d333442A

4.) relock remainder LP tokens for 1 year (unlocks on 5/~23)

B.) ~25% LP tokens locked in mudra for 2 months. (Unlocks 60 days after event completion (6/~22)

Delegation functions as:

0.) redeem x bnb for (\$100) in stablecoin and send to the bCAT.

1.) redeem x bnb for (~\$250/.5 WBNB) to be into SushiSwap Private Pool.

2.) redeem x bnb for (~\$250 into stablecoin), put into proactive liquidity reserve

0x58b96a9af732b0EB60624C7f993dF476d333442A

3.) redeem ~1 bnb (.10 bnb a piece) to: Charity Arm Guardian, Charity MultiSig Wallet A, Charity MultiSig Wallet B, Charity MultiSig Wallet C, Charity MultiSig Wallet D, Charity MultiSig Wallet E, Charity MultiSig Wallet F, Charity MultiSig Wallet G, Charity MultiSig Wallet H, Charity MultiSig Wallet I.

4. relock remainder LP tokens for 2 years (unlocks on 5/~24)

C.) ~25% LP tokens locked in mudra for 3 months. (Unlocks 90 days after event completion (7/~122)

Delegation functions as:

0.) redeem x bnb for (\$100) in stablecoin and send to CAT.

1.) redeem x bnb for (~\$250/.5 WBNB) to be into DodoDEX Private Pool.

2.) redeem x bnb for (~\$250 into stablecoin), put into proactive liquidity reserve

0x58b96a9af732b0EB60624C7f993dF476d333442A

3.) redeem x bnb for (~\$250/.5 WBNB) to be into OpenOcean Private Pool.

4.) relock remainder LP for 3 years (unlocks on 5/~125)

D.) ~25% LP tokens locked in mudra for 6 months. (Unlocks 180 days after completion (10/~122)

Delegation functions as:

0.) redeem x bnb for (\$100) in stablecoin and send to CAT.

1.) redeem x bnb for (~\$250 into stablecoin), put into proactive liquidity reserve

0x58b96a9af732b0EB60624C7f993dF476d333442A

2.) redeem x bnb for (~\$250/.5 WBNB) to be into ApeSwap Private Pool.

3.) relock remainder LP for 4 years (unlocks on 5/~126)

That commences the Alpha Contribution event.

After completion of the Alpha event, the following contribution events will move forward following the same general design as Alpha.

Bravo Contribution Event date = 28 days after time of goal reached in Alpha Contribution Event.

Charlie Contribution Event date = 28 days after time of goal reached in Bravo Contribution Event.

Subsequent Contribution Event dates = Dates to be advised in 2023 Whitepaper.
